

NUCLEAR TRAINING COURSE

COURSE 133

- 1 - Level
- 3 - Equipment and System Principles
- 3 - REACTOR BOILER AND AUXILIARIES

Index

Reactors

- 133.10-1 The Function of a Reactor
- 133.10-2 Reactor Classification - Fast & Thermal Reactors
- 133.10-3 Reactor Classification - Types of Thermal Reactors
- 133.10-4 Reactor Construction

Moderator Systems

- 133.20-1 Moderator Requirements
- 133.20-2 Moderator Properties and Comparison
- 133.20-3 Moderator System & Equipment Considerations

Heat Transport System

- 133.30-1 Heat Transport Fluid Requirements
- 133.30-2 Heat Transport Fluid Comparisons
- 133.30-3 Main Circuit Considerations
- 133.30-4 Auxiliary Circuits

This course was originally developed for the use of Ontario Hydro employees. Reproduced on the CANTEACH web site with permission

Reactor Boiler Auxiliary Systems

- 133.40-1 Reflector Systems
- 133.40-2 Shield Cooling Systems

Reactivity Mechanisms

- 133.50-1 The Functions of Reactivity Mechanisms
- 133.50-2 Comparison of Reactivity Mechanisms

Heavy Water Handling and Recovery

- 133.61 Lessons to be written

Heavy Water Upgrading

- 133.62-1 Upgrading Requirements and Processes
- 133.62-2 Principles of Isotope Separation
- 133.62-3 The Distillation Upgrading Process
- 133.62-4 The Electrolytic Process
- 133.62-5 Common Problems

Fuel

- 133.71-1 General Considerations
- 133.71-2 Preparation and Manufacture
- 133.71-3 The Canadian Designs and Their Performance

General Considerations - Safety

- 133.91-1 Safety Standards and Safety Measures
- 133.91-2 Emergency Injection and Containment Systems
- 133.91-3 Safety System Performance

General Considerations - Chemistry

133.92-1 Chemistry of Water Circuits
